To whom it may concern:

XM Radio is very beneficial to myself and my family. We have a much broader selection and can take it all over the country should we choose too. The news and talk radio are the same as the local radio, but with no commercials, and no loss of signal. The traffic updates and a considerably better than the local selection because of the 24 hour availability of such programming. We look forward to hearing commercial-free satellite radio for many years to come in the future.

sincerely,

Benjamin S. Bell
